

Compliance navigator for regulated firms. Live obligation oversight, hash-chained audit, Dear-CEO automation.

What it does

RegAlign keeps every regulatory obligation **alive, attributed, monitored, and auditable** for compliance officers, MLCOs (Money Laundering Compliance Officers), and boards in Channel Islands and UK supervisory regimes. RegAlign is a compliance-risk OS — not a SAR or transaction-monitoring tool.

One source of truth for what the second line owns. A signal-only Daily Digest for what changed. A hash-chained record of every decision, exportable and independently verifiable.

Headline capabilities

Capability	What it replaces
Live obligation register with named owners and workflow attribution	Static obligation spreadsheets, PDF binders
Insights Hub — 20 governance lenses on the live programme	Quarterly management-information packs
Daily Digest — signal-only morning email	Inbox triage, "what should I look at first"
Dear-CEO loop — attribute regulator letters to your controls, flag gaps, draft the board response	Manual mapping exercise, weeks of work
Board packs with cryptographic seal on finalisation	Word documents that nobody can prove weren't edited later
Value Realised dashboard — hours saved, cash equivalent, AI accept-rate	Anecdotal "we feel more on top of things"
Public chain verifier at <code>/verify</code>	Trust-us-bro audit assertions

Pricing (post-pilot)

Tier	Year-1 ACV	What's included
Standardised	£9,500	Single jurisdiction. Insights Hub, Daily Digest, Value Realised standard.
Bounded	from £25,000	Multi-jurisdiction packs, group-rollup, one configured workflow walkthrough.
Bespoke	POA	≥2 workflows priced today, dedicated environment, cross-group.

Year 2 = year 1 (written at signature). Year 3+ CPI + 3%, capped at 7%.

Pilots: Startup TCB £7,500 (90 days). Equiom-scale £12,000 (120 days). Both include reference-price protection, pen-test letter, DPIA, BCP, sub-processor list, single-founder continuity clause.

Why now

The Channel Islands supervisory regimes are converging on continuous evidenced oversight. The FCA's Consumer Duty and Dear-CEO cadence is the same direction of travel in the UK. Firms that can answer "prove this control has been live and effective for twelve months" in seconds will win. Firms that can't will spend the next two years catching up.

What makes it defensible

- **Hash-chained audit** — tamper-evident, publicly verifiable, no login.
 - **Per-tenant AI appetite** — your appetite, not ours.
 - **Multi-jurisdiction primitives** — same engine, jurisdiction-specific evidence.
 - **Trust Centre at `regalign.app/trust`** — first-24-hours diligence in one URL.
 - **Engineered IP** — proprietary wordmark, intra-group licence stack, founder IP assignment deed.
